

EdgeSoft, Inc. and Avolve Software Form Partnership

EdgeSoft, Inc., a provider of world-class software solutions that empower local governments to deliver superior citizen services, and Avolve Software Corporation, the world's leading provider of communication and collaboration software solutions for electronic plan review, submission and information re-use, have entered into a partner agreement to offer integrated, comprehensive permitting and ePlan solutions to the Public Sector.

SCOTTSDALE, AZ — May 4, 2011 — EdgeSoft Inc., developers of eGovernment solutions for Local Governments and Avolve Software Corporation, developers of ProjectDox® communication and collaboration software and the leading provider of ePlan submission, review and tracking solutions for local and national governments worldwide, announced today they have partnered to provide more comprehensive integrations between EdgeSoft eLMS product suite and Avolve software ProjectDox solution to their mutual customers and markets.

Edgesoft's Enterprise Land Management System (eLMS™) is a web-based, flexible system for local government to manage land data. The multi-tiered solution is based on a unique three-dimensional Land, Structure, Occupancy (LSO) addressing model. This architecture provides a comprehensive method by which to map and document all historical data and current information, regarding services or obligations pertaining to each parcel.

Avolve Software solutions support paperless, automated processes for plan review and approval, performed by multiple government agencies including Building, Planning, Fire, Land Development, GIS and Public Works. Large and small jurisdictions nationwide with millions of constituents incorporate Avolve's ProjectDox ePlan solution as a primary technology for streamlining land development, design/construction plan approval and inspection required for regulatory code compliance and maintaining as-built plan data.

"Avolve is a forward-thinking, highly focused company; they've established ProjectDox as the standard ePlan solution and the solution in which all others are measured in the state and local government market," said Shan Sundar, Founder and Chairman of EdgeSoft. "We look forward to working with their customers and our customers to provide integrated solutions to the problems facing local governments."

Local governments are under pressure to provide citizens with more efficient, cost-effective solutions leveraging their platform investments with Microsoft and Esri to provide government efficiencies and in Permitting, Building & Planning and Public Works. Web-based systems such as EdgeSoft's eLMS™ and ProjectDox facilitate advanced process automation, communication and collaboration between department and citizen stakeholders, ensuring accurate and re-usable information that extends and expands the value of government services within and beyond the community.

"We are very pleased with the partnership and future with EdgeSoft," said Ron Loback CEO and President of Avolve Software. "Our technology is uniquely positioned to cities integrate with Permitting and eGov solutions. This partnership demonstrates our commitment to our mutual existing customers with EdgeSoft and future requirements of the market."
