"The key breakthrough for citizen services and engagement will be the implementation of enterprise content management, record management, and process management infrastructure, integrated by collaborative content management tools and policies and available 24 x 7."

Transformation Options in 2011 - Government Insights (an IDC Company)

A Practical Session - *Learn, Share and Engage!*

Dear {!Contact.FirstName},

We invite you to join Avolve Software, EdgeSoft and your leading public sector peers from the greater Los Angeles Metropolitan Area for a no-nonsense seminar & roundtable hosted at the Microsoft Southwest District Office, Los Angeles.

Learn about land management and the integration of electronic plan technology, and how together they enable essential, strategic planning and management for cities and counties that must streamline processes, eliminate paper, collaborate on projects and maximize value for citizens and stakeholders.

Here's what's on the agenda:

- Hear city management expert Rod Wood and other local officials discuss and interchange their experiences, including best practices and project information workflow.
- Hear from information technologists regarding how you can leveraging existing infrastructure and applications such as GIS and Cloud to create value-rich services for internal and external stakeholders
- Extending land management and ePlan value and processes across multiple departments/agencies

This session is ideal if you:

- Are concerned or responsible for greening your business workflow and getting rid of manual and paper intensive processes

- Are grappling with backlogged requests, reduced funding and less staff support
- Would like to learn how other agencies have streamlined their operations and gone paperless while making existing investments in Permitting, EDMS, ERMS and GIS more relevant
- Would like to network with your SLG peers and experts in automated document workflow
- Want to understand better the concerns and trends affecting your citizen customers.

We look forward to seeing you and others from **{!Account.Name}** on Tuesday, June 21, 2011. We'll have a great discussion and lunch is included.

Avolve Software is the world's leading provider of automated electronic plan (ePlan) submission, review and tracking solutions to local, state and now federal governments. We've been helping jurisdictions and agencies of all sizes streamline their work processes, "green" their operations, do more with less and increase customer and staff satisfaction. **More information...**
